Urban Survival: The Beginners Guide To Securing Your Territory, Food And Weapons (How To Survive Your First Disaster) (Urban Preppers Survival Guide, SHTF, Emergency Preparedness)

Synopsis

When disaster strikes, don't be left standing clueless. Urban Survival Handbook is your comprehensive series of survival strategy tips and guides. When it comes to survival you'll need to protect not only yourself but also property and loved ones around you. Securing and replenishing is essential to getting out alive. Make sure you know exactly how to handle any disaster situation, otherwise the results may be fatal. Whether you are caught in the city during a major earthquake or experiencing World War 3 in your neighborhood it is always important to be prepared, not just with equipment, but with knowledge in how to execute in any dire situation. You Will Learn How to properly ration perishable food in the refrigerator and store them for maximum expiration Starting a fire with anything in your house Fortifying and barricading your home Improvising tools and weapons from looters, zombies and thieves Locating and tapping into every source of water supply possible And much, much more! Download this book and ensure you survive your first disaster.

Customer Reviews

This book really makes you stop and think about surviving in a big city when a disaster hits. Lots of good ideas to get you started with water, food, and especially security. This also applies to weather

situations that we seem to have a lot anymore. Hurricanes, floods, and blizzards can all lead to a survival situation and the tips in the book could save your life or the life of a loved one.

Imagine if someone with a 5th grade reading level watched a Sunday afternoon marathon of "Doomsday Preppers", drank a fifth of Jack Daniels, and then decided to write a 20 page book on what they had learned that day. Excerpt: "Fire is an extremely volatile substance...if you have a fireplace, that is the best location for the fire. It has a built in exhaust, which can vent smoke and fumes, and is made of brick, which cannot combust." The "author" then goes on to explain how you should start a fire in a large pot inside your house, but be careful, because "filling the house with smoke can be dangerous on the lungs". This is basically just 20 pages of general thoughts and bad advice with no actual information. Do not buy it. I recommend: *How to Survive the End of the World as We Know It: Tactics, Techniques, and Technologies for Uncertain Times*

This book, is one of the worst I have read, and I read a lot of garbage.. It says "26 pages" but it is really 11 pages. NO IMAGES or diagrams of any kind. All the content is so obvious, it makes you feel stupid having had to read this.... i mean entire subjects covered by a few sentences. It offers no real specific instructions, just basic generalities, like - the importance of staying warm, the importance of firewood... like really> ?. Oh there is one super helpful entire paragraph explaining how you should eat all the food in the refrigerator before it spoils... thats about it.. there i told you... now buy a better book. I wish i had another one to recommend... but I do not yet.... If i encounter one, i will add the link below to save you.

A Book that prepares you for the worst. Whenever an emergency situation (like a flood, hurricane, earthquake)strikes uswe are usually caught unaware and that is why people suffer so much. Just imagine if we are always well prepared for theworst kind of disaster. There would be minimum chaos as most of our emergency needs would have already been taken care of.This book teaches you all the things that you can do to be prepared for such a scenario !

The measures to be taken for securing home under section "Securing Your Home" were of great help. Great precautionary measures outlined in the section "Shutting Off Your Utilities". Enjoyed going through each and every section of this book. Liked it very much and will definitely spread the message, precautions and tips mentioned in this book to my friends and family members.

When boiling water to purify....3 mins tops. He mentions not wasting due to evaporation then tells you to boil for 10 mins. Really. When boiling, the water reaches 220° F which is enough to clean it. Anyway. I'm not the expert. Good luck.

One can never be too prepared, especially when it comes to surviving disasters. This is a fantastically written prepping book with a ton of innovative tips and tricks. Once you read this book you will feel confident and prepared for any adversities that you may have to face in your future.

There are no step by step instruction for buildables to assist in survival. It relies on a broad explanation of how to fortify your residence and what things to be aware of when you are isolated. More depth in items to have ready and where to find items you need or how to create items you need would have been ideal
