Great condition for a used book. I would not recommend these for first time project builders as some involve real risk to one's self and others. A understanding of electronics and electrical theory is

recommended. Projects range from intermediate to advanced. But otherwise, I can't wait to start building!

It will be loved by son as long as nothing burns down. I joke but it does have some interesting projects that caught my attention and this is not my forte.

Full of fun things to do for adults. Nothing for kids in here. Some stuff seems a bit dangerous, but fun to read about
