The New World Champion Paper Airplane Book: Featuring The World Record-Breaking Design, With Tear-Out Planes To Fold And Fly

Synopsis

Featuring the coolest looking paper airplane from the movie, "Paper Planes". The Star Fighter, in the lower right corner of the cover, plays a starring role in the movie. It's the wind tunnel tested, super plane that wins contest after contest for the villain. It's easily the most dangerous looking plane in the movie. A collection of easy-to-fold paper airplane designs and innovative theories of flight, including the author's Guinness World Record-breaking airplane. Features 16 tear-out model planes. This is the book you saw on Conan. Will YOU be the next to break the WORLD RECORD? The first person to officially break the world record with John's plane will get \$1,000. Anything is possible with The New World Champion Paper Airplane Book, the newest collection of designs and theories of flight from John M. Collins, the man behind the Guinness World Record-breaking distance plane. Featuring twenty-two unique airplane designs with step-by-step instructional photos, plus tear-out models printed on regulation-weight paper stock, this entertaining and informative guide promises hours of flying fun. Take your paper airplane-making to the next level with features such as: Instructions for folding "Suzanne," the plane that shattered the previous world record by flying an unprecedented 226 feet, 10 inches, and garnered more than three million views on YouTube. Four "Follow Foil" aircraft that can stay aloft for minutes at a time. A pioneering cambered-wing plane. A primer on flight theory, and how it applies to paper airplanes. Tips for improving the accuracy and distance of your throws. The adjusting technique that helped break the record. And more!

ISBN-10: 1607743884

ISBN-13: 978-1607743880

Product Dimensions: 8.5 x 0.5 x 10.8 inches

Shipping Weight: 12.8 ounces (View shipping rates and policies)

Average Customer Review: 4.4 out of 5 stars. See all reviews (63 customer reviews)

Best Sellers Rank: #26,780 in Books (See Top 100 in Books) #2 in Books > Engineering & Transportation > Engineering > Aerospace > Aerodynamics #6 in Books > Crafts, Hobbies & Home > Crafts & Hobbies > Toys & Models > Toymaking #16 in Books > Crafts, Hobbies & Home > Crafts & Hobbies > Papercrafts, Stamping & Stenciling > Origami

Age Range: 8 - 12 years

Grade Level: 3 - 7

Customer Reviews

This is one of two "must have" paper airplane books that are out there for serious folders. I have collected almost every paper airplane book in or out of print that I could find in the last few years as I discovered that paperflight was a great way to combine two of my hobbies: paragliding and origami. So being the obsessive that I am for these sorts of things, I started rounding up every book on the subject and I discovered that there are really just two books that I couldn't do without: this book and LaFosse's "Planes for Brains." Inside this book you will find all of Mr. Collins' most useful and elegant models with a few exceptions that can be found in his first book, "The Gliding Flight." The "Suzanne" model which was used to set the distance world record referenced in the title of the book is really the most elegant and impressive plane model around. It is simple enough that anyone over 6 or 7 could fold it, but it just goes and goes. Forgoing the tape and using nose or fuselage locks makes for a go-to plane in any situation. Two others not to miss in this book which were included in earlier books of his are the "Starfighter" and the "Boomerang." Both are great, especially the latter. With some practice at both folding and flying, the Boomerang is too much fun. And how Collins ever figured out how to fold this plane is a mystery as its folds are rather non-intuitive, however it is definitely worth learning. There seems to be some dissatisfaction regarding this book in that the models are too complex. They are complex, but they are not the most complex around. They are, however, the most accomplished around.
