This author really understands the need for children to use real materials rather than "made for kids" materials. Once you make the necessary boards, a playhouse can be built and taken apart and rebuilt. No need for a moving truck to move the project, just unstack the boards and rebuild at a new site. This is for a parent or family member who has some carpentry skills themselves and has the time to make the initial investment of skill/time which pays off big for your carpenter/builder child.

We are currently working to build the pieces and the kids can't wait to build their playhouse using this book!

taught my child how to take apart things. he did it with such an ability that I was baffled at the sight

Very unclear instructions. Book helps but barely anymore than. What's available free online.

The book direction for making the play house is clear and work great.
