# Automotive Heating And Air Conditioning (7th Edition) (Automotive Systems Books)

## Synopsis

Ideal for both novice and advanced technicians, *Automotive Heating and Air Conditioning, 7/e* provides a complete, state-of-the-art source on automotive heating, ventilation, and air conditioning systems. Correlated to NATEF and ASE tasks, the text focuses on the generic theory that underlies the operation, diagnosis, and repair of the units and subassemblies found in the many makes and types of vehicles students will likely encounter on the job. Formatted to better meet the learning needs of today's technical trade students, it visually supports concepts covered throughout, and includes many practical shop tips that guide students through important problem-solving procedures they'll use on the job. This book is part of the Pearson Automotive Professional Technician Series, which provides full-color, media-integrated solutions for today's students and instructors covering all eight areas of ASE certification, plus additional titles covering common courses. Peer reviewed for technical accuracy, the series and the books in it represent the future of automotive textbooks.

## Book Information

Series: Automotive Systems Books

Paperback: 304 pages

Publisher: Pearson; 7 edition (August 7, 2014)

Language: English

ISBN-10: 0133514994

ISBN-13: 978-0133514995

Product Dimensions: 8.4 x 0.6 x 10.7 inches

## Customer Reviews

This book was required for my Air Condition Heating class. It shows good picture to understand how HVAC works.

I've passed every ase I've bought one of these for

Got it super fast just like the description everything looks good just a lil bend but other than the it's perfect

Fast shipping! Exact book I needed for the T-TEN Toyota program Im in!

Good book, lots of detail and color photos
